

➤ **What was the Inspiration behind taking up this Particular Subject for the Webinar?**

A project was submitted to CRDF global under the scheme of building networks among women to share best practices and experiences working in the nuclear security and non-proliferation sector. This would enable the grantee to expand her network and explore the options available for aspiring candidates in the nuclear sector.

➤ **Distinguished Guest Speakers Invited for the Event.**

1. Dr. Manpreet Sethi, Distinguished Fellow, Centre for Air Power Studies, New Delhi, manpreetsethi@hotmail.com
2. Dr. Meera Venkatesh, Retired Director: Division of Physical and Chemical Sciences IAEA, Former Head-Radiopharmaceuticals Division, BARC, prof.mvenkatesh@gmail.com
3. Prof. Vandana Nanal, Professor, Dept of Nuclear and Atomic physics, Tata Institute of Fundamental Research, vnanal@gmail.com
4. Dr. Umasankari Kannan , Head Reactor Physics and Design Division, Bhabha Atomic Research Centre, Mumbai , uma_k@barc.gov.in
5. Zoya Akhter, Research Associate, Nuclear Studies Group, Centre for Air Power Studies New Delhi, zoyakhter@gmail.com
6. Dr. Kanica Rakhra, Munich Young Leader 2021, Kanica.r@gmail.com
7. Dr. Tanvi Kulkarni, Policy Fellow, Asia Pacific Leadership Network, tanvi.mailmehere@gmail.com,
8. Dr. Silky Kaur Associate Fellow, Centre for Air Power Studies, drsilkykaur@gmail.com

They would be directly remunerated by CRDF global USD 70 each for their sessions. Their CVs have been attached with the mail for their educational qualification details.

➤ **What was the Criteria Considered for inviting the Various Individual Guests, Internal as well as External ?**

The guests are all women working in the nuclear sector.

➤ **Were the guests in advance and if yes, from what previous interaction? Were the guests Recommended by someone. If yes, who ?**

Some of the guests had visited AINST at various interactions and others were suggested by either Head AINST, Advisor AINST and guest speakers themselves as they had worked with them.

➤ **Who all attended the webinar? Also, if possible, give the numbers.**

The attendees comprised of students, researchers, and faculty from various institutions. The attendee list has been attached here. There were 59 and 41 attendees on 10th and 11th December 2021 respectively.

➤ **What were the ‘Take Homes’ for the Guests and the Attendees in the form of knowledge, facts, information etc.? Please give the Salient Novel Points Covered by the Guest Speakers, in Bullet Points Format.**

1. Nuclear security appears as a male preserve. Inclusion of women voices would bring in diversity this would bring richness in the national security aspects.
2. Major gender gap exists in the sector. (Think tank culture is quite recent, technical streams lack women participation due to lack of awareness, opportunities, and funds)

3. Interpretation and reading between lines important. Language competency and more literature is essential.
4. Women suffer from imposter syndrome which might be acting against them giving the best in any sector.
5. The opportunities are limited/restricted in this sector for women. Situation slowly improving although.
6. Lack of funds, income opportunities in nuclear security studies.
7. Since the outputs are intangible in the sector strong motivation and passion drives the researcher.
8. Women have an edge over men since they might be side earners. Better avenues and more passion to pursue their hearts despite less funding.
9. Metro cities having major opportunities for study, research, and jobs.
10. Women from all streams are working in the sector at various positions.
11. There are taboos associated with women workers (excess leave, having soft stands on issues of national importance)
12. Schemes are available at the national and international level to support suitable candidates.
13. Working in closely connect with the agencies handling sensitive matters gives better insight of the issues of national importance, Internships and industry connect is importance henceforth.
14. Lack of work ethics, empathy for coworkers hinderance for women workers.
15. For all women achievers: mentors and family support were crucial.
16. Lack of education opportunities in remote areas and non-metro cities.
17. Women face lack of support from family.

➤ **Has the Webinar been able to generate any Tangible Gains for the Faculty, Researchers and Students of Amity. If yes , what are these ?** This was planned to understand and highlight the challenges faced by women working in the nuclear sector. The following are the main findings/recommendations:

1. Research must be decentralized. Industry, government, and academia must work in conjunction for best outcomes in terms of policies and technology development.
2. Promote cross disciplinary research for better results/outcomes.
3. Develop /promote institutes of excellence in areas of nuclear safety, security, and policy. They are facing shortage of funds, its only passion which is presently ensuring good candidates pursue a career in the area under consideration.
4. Women at leadership positions may/to promote and provide equal opportunities to deserving candidates. Provide means of promotion, support for women to occupy leadership positions (giving due regards to their personal responsibilities).
5. Language competency /expertise is essential (international relations /studies), this might be a challenge in Indian subcontinent since we are multilingual. At times English is the third language.
6. Nuclear security and international relations must have experts coming from various backgrounds to bring in more richness to the subject. Opinions /recommendations from each sector will improve the techniques and policies both.
7. Aspects of nonproliferation and disarmament must have voices from either gender to ensure better handling of matters.

Radiant Women: experience sharing forum

8. Forums like women in nuclear, Women scientists association, can promote and encourage many more women candidates to contribute for the sector.
9. Gender matters at younger age, later its professional passion and quality of work. Women must speak and bring their opinions to light.
10. Mentoring would augment present schemes in industry to give more confidence to women candidates.
11. Welfare schemes like childcare facilities (childcare Leave, flexi work timings, Creche etc.), can bring in more women to continue their careers in the nuclear sector.
12. Support from family, colleagues, friends, and society is of utmost importance.

➤ **What are the ‘Progressive Outcomes /Way Forward’ planned, based on the event of the webinar. Please give them pointwise, with timelines and names of the persons responsible for their execution.** We are working on the women in nuclear India chapter, and this would help us strengthen our initiative. As a board member this will help us build our organization. This would encourage more women candidates to pursue careers in this sector. This also gave some visibility to the institute and faculty. The speaker from BARC also expressed interest to visit AINST, this would be beneficial for our students and faculty.

➤ **Have we Followed-Up with the Guests to consider Various Collaborations such as Joint Research Papers and Publications; Joint Funded Projects; Student Internships and Placements; Participation in National/ International Seminars/ Conferences,/Workshops ; Student/Faculty Exchange Programmes ; Post Doctorate tie ups ; etc. etc.**

our students are already beneficiaries of various such initiatives. We have been sending them for internship and projects at their prestigious organizations and their work is being appreciated. Both Faculty and students have also been beneficiary of being able to participate in various seminars organized by organizations like Centre for Air power Studies, New Delhi.

➤ **What are the plans for utilizing the contacts developed with the Invited Guests, for future cooperation to meet the targets of ‘Mission: Connect’ and Mission: Synergy of Brains? Please give a roadmap with timelines.**

The speakers will be invited for expert interactions and guest lectures for subsequent semesters. This would bring in more internship and project opportunities for our students in not only technical aspects but also policy sector.
